PROFESSIONAL SUMMARY

I am a 3rd-year Computer Engineering student at Ege University. As the Vice President of the Computer Engineering Society, I take an active role in leadership, team coordination, and event management. I am currently advancing my skills in software development, data science, and machine/deep learning (ML/DL). By blending this technical vision with my proactive mindset and strong communication skills, I aim to deliver innovative projects within the technology ecosystem.

EXPERIENCE

AI/ML Engineer Intern | Apprel — **OCTOBER 2026 – PRESENT**

- Selected to join the engineering team as an AI/ML intern; preparing to contribute to the development and deployment of machine learning models and artificial intelligence solutions.

Vice President | Ege University Computer Engineering Society — **OCTOBER 2025 – PRESENT**

- Took an active role in the founding process of the society and established its organizational structure; currently responsible for event planning, team coordination, and university-wide communication management.

Intern Researcher (STAR) | TÜBİTAK 2247-C STAR Program — **JANUARY 2026 – SEPTEMBER 2026**

- Successfully delivered and integrated the developed MLP model into a Java (Maven, SQLite) desktop application for real-time donor-recipient matching.

AI Engineering Intern | Microsoft Turkey (Remote) (AI Innovators Program) — **JUNE 2026 – AUGUST 2026**

- Developed two Retrieval-Augmented Generation (RAG) projects by conducting hands-on studies on modern AI architectures, leveraging LLMs and vector embeddings within the AI Innovators Summer Internship Program.

Software Team Member | EGE SAVTEK Rocket Team — **OCTOBER 2023 – DECEMBER 2023**

- Developed a C#-based software to collect and analyze rocket telemetry and launch data; played an active role in intra-team problem-solving and debugging processes.

EDUCATION

Ege University — Bachelor's Program in Computer Engineering

- English Preparatory Program completed (Grade: 92/100)
- Cumulative Grade Point Average (CGPA): 3.62 / 4.00

AWARDS AND ACHIEVEMENTS

🥈 Second Place Award (Izmir) and All Star Participant | Turkcell "Geleceği Yazanlar" Code Night Hackathon Qualified for the All Star stage by placing 2nd in the local stage. Part of the team that developed a REST API-based full-stack solution (Java, JavaScript, HTML, CSS). Actively contributed to the problem analysis, backend architecture design, and presentation of the final solution.

SKILLS AND CERTIFICATES

- **Technical:** Python, Java, C#, SQL (PostgreSQL, SQLite), Git, OOP, Machine and Deep Learning, HTML/CSS
- **Languages:** English (Advanced), Turkish (Native)
- **Certificates:** Aspire Leaders (Aspire Inst.) | Academic Coaching (Kant Akademi) | C# Workshop (BTK)

PROJECTS

- **Offline RAG System:** Offline RAG model with hybrid search and cross-encoder architecture.
- **Cornea Matching (TÜBİTAK):** Clinical/biological compatibility-based, rule-based cornea-donor matching algorithm (Java, SQLite).
- **Smart Waste Classification:** Custom CNN-based image classification optimized for Edge/IoT devices.
